

Key benefits

- 1** Supports all aspects of cardiac health
- 2** Broad spectrum cardiac support due to unique active ingredients
- 3** Natural well-tolerated product that can be used alongside most commonly used heart medications

How do you administer Omnicardio?

Continuous Omnicardio supplementation is recommended, without intervals, throughout the animal's life.

Formulation

60 palatable tablets

Omnicardio[®]

Nutritional Cardiac Support

Omnicardio supports cardiac function of dogs and cats

What can you expect from Omnicardio?

Omnicardio can support the health of the cardiac system and maintain optimal patient health.

- Maintenance of myocardial contractility
- Maintenance of healthy systemic arterial pressure
- Supported coronary circulation
- Maintenance of nutrition required to support a healthy myocardium

Composition, mechanisms and effects

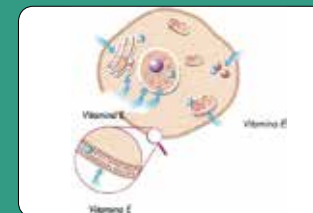

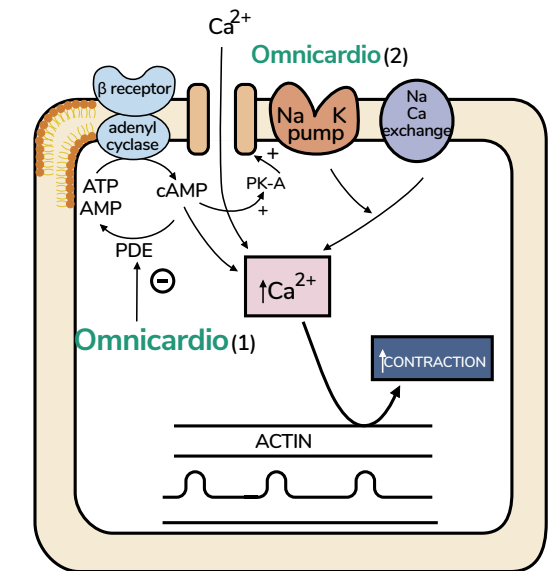

Crataegus
100 mg

- (1) Inhibition of PDE3.
- (2) Inhibition of the Na⁺/K⁺-ATPase pump.

Effects

- Maintains efficient contraction of myocardium
- Supports cardiac rhythm
- Aids coronary circulation (delivery of oxygen and nutrients to the myocardium)
- Maintains a relaxed peripheral vascular system

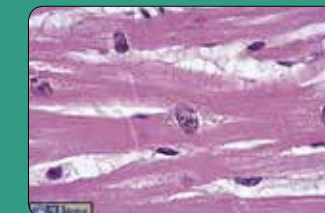

Vitamin E
100 mg

- Antioxidant
- Supports synthesis of myoglobin

Effects

- Aids oxidant levels and maintains healthy Vitamin E level

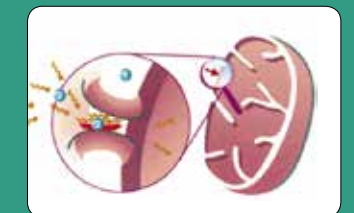

Taurine
100 mg

- Supports cardiac contractility
- Aids excretion of Na in urine

Effects

- Supports natural diuresis
- Maintains efficient myocardium contractions

L-Carnitine
500 mg

- Supports cellular respiration and energy performance of myocardial cells

Effects

- Essential amino acid in cats
- Maintains adequate cardiac nutritional support
