Pack of 150 capsules  
Pack of 30 capsules  
Container of 200 ml

# Omnicutis<sup>®</sup>

Nutritional Skin Supplement

Omnicutis is a complete nutritional supplement to support healthy skin. It contains the highest concentration of the most effective Omega 3 fatty acids (EPA and DHA) along with all the essential nutrients to maintain skin health, Antioxidants (Vitamins C & E) and Zinc to support the immune system and Vitamin A to maintain healthy epithelium.

# Composition and specific actions of Omnicutis

Omnicutis has seven natural ingredients which are proven to be most beneficial for the skin:

Omega-3 fatty acids support the natural inflammatory system and are essential for the maintenance of healthy skin.

OMEGA 3 - EPA	
354 mg	107 mg
OMEGA 3 - DHA	
231 mg	71 mg

ZINC (in the form of organic chelate)	
14.4 mg	7.2 mg

Zinc is an essential element in supporting the immune system and maintaining healthy skin and nails. It also has a proven synergistic action with Omega-3.

Antioxidants are essential for the support of free radicals. Vitamin E and C respectively work as co-factors which support the immune system and synthesis of collagen.

ANTIOXIDANTS Vitamin E and C	
25.5 IU	5.7 IU
9 mg	6.3 mg

VITAMIN A	
900 IU	1500 IU

Vitamin A is an important ingredient for the maintenance of haemostasis of the epithelium.

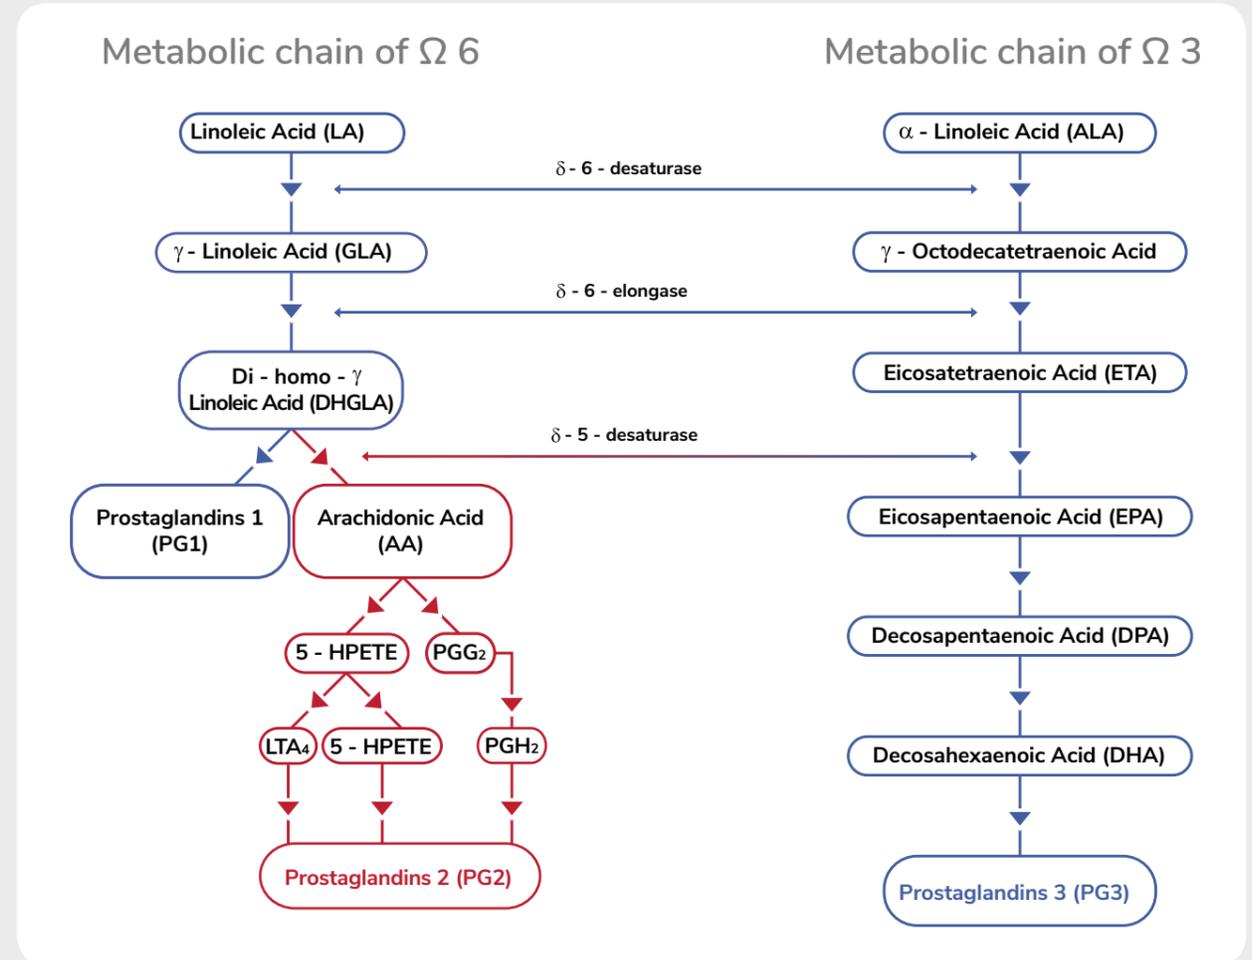

MSM supports the action of all the other elements by favouring membrane permeability. This transport effect is especially effective on the skin. Supplementation of MSM is beneficial for the health of hair and nails.

SULPHUR MSM or Biotin	
210 mg	-
-	20 ug

\* Composition per 10 kg of body weight. (3 ml of liquid or 1 capsule)

## Why $\Omega$ 3? Why not $\Omega$ 6?

Omega-3 supports the body's inflammatory system. By contrast, Omega-6 has an ambiguous effect.

Omega-3s are the most beneficial essential fatty acids and, due to their position in the metabolic chain, EPA and DHA are the most effective.
