To Whom It May Concern:

In September 2019, Vita (Europe) Limited, also trading as Vita Bee Health reached an agreement with Medivet and the Canadian Honey Council to restart production of Fumagilin-B, an aid for the prevention of Nosemosis in honey bees. The manufacturer is **Can-Vet Animal Health Supplies Ltd., 61 Malcolm Road, Unit 4, Guelph, ON, N1K 1A7.**

To make available this important medication as soon as possible, for the autumn/fall treatment season of 2019, the first commercial batches (lot numbers **881126** and **881127**) were packed into white polypropylene containers. Future production will be packed into black polypropylene containers.

To get the product to market as quickly as possible and not miss the season, it was not possible to apply security / tamper evident seals to these two batches (lot numbers **881126** and **881127**), a pressure seal within the lid was used instead. We confirm that this provides sufficient seal to protect the integrity of the product. Future production will be packed into containers with security / tamper evident seals.

For the avoidance of doubt, I hereby confirm that the absence of a security / tamper evident seal on Fumagilin-B produced by Can-Vet Animal Health Supplies Ltd. and bearing the lot number **881126** or **881127** does not indicate that the package is not genuine or has been interfered with.

For any further information please don't hesitate to contact me.

Yours faithfully,

Sebastian Owen
Director
